### Trivia - Here are some FUN FACTS about recycling.

A modern glass bottle would take 4000 years or more to decompose -- and even longer if it's in the landfill.

Mining and transporting raw materials for glass produces about 385 pounds of waste for every ton of glass that is made. If recycled glass is substituted for half of the raw materials, the waste is cut by more than 80%.

07. Check out what's new at the WWG Media Center. "Peak" by Roland Smith

When 14 year old Peak Marcello's long-lost father presents the opportunity for them to summit Everest together, Peak doesn't even consider saying no even though he suspects there are a few strings attached. And if he makes it to the top before his 21st birthday, he'll be the youngest person ever to stand above 29,000 feet. It's not a bad turn of events for a guy who's been stuck in New York city.

Here in Peak's own words, is the exhilarating, gut wrenching story of what happened on that climb to the top of the world-a climb that changed everything. Welcome to Mr. Everest.
